

This anthology of personal testimonials by parents reveals how gender identity impacts vulnerable adolescents and their families. A critical resource for parents, medical professionals, and decision makers.

Available now on Amazon.com

In this award-winning documentary on detransitioners, five young people discuss the care they received for gender dysphoria and how they subsequently realized it was the wrong treatment. The documentary cites 40 academic medical studies and features twelve experts – MD's, LMFT's, PhD's with decades of experience treating dysphoric patients.

*"Nuanced, compassionate, deeply researched."* Awards Daily

Dear Colleague:

A group of progressive parents, therapists and physicians have produced “**NO WAY BACK: The Reality of Gender-Affirming Care**,” a non-political, non-religious documentary about detransitioners citing 40 medical studies and evidence reviews, including recent European research on pediatric gender medicalization. We implore you to stream or order a DVD of the documentary. Also, please read our sister project, “**Parents With Inconvenient Truths About Trans**,” an anthology of parent testimonials. While we wait for the American Academy of Pediatrics to conduct the promised systematic evidence review of gender-affirming practices, American kids – especially vulnerable gay, lesbian, bi-, autistic and non-conforming kids – deserve to grow up whole and reach adulthood without sexual dysfunction, sterilization, and chronic pain from synthetic hormones.

Thank you,

Faith Lindner, MD, Parent, [www.nowaybackfilm.com](http://www.nowaybackfilm.com)
